

CALL FOR CHAPTERS

Proposals Submission Deadline: *May 15, 2019*

Full Chapters Submission: *September 30, 2019*

“Multiple Criteria Decision Models in Supply Chain Management”

A book edited by Fouad Ben Abdelaziz and Hatem Masri

To be published by Springer Springer under the Series “Multiple Criteria Decision Making”

Introduction

This volume aims to report recent developments and applications of Multiple Criteria Decision Aid models in Supply Chain Management field. It includes methods and procedures designed to manage the chain of supplies using multiple objective mathematical programming models as well as other quantitative multiple criteria decision models. The target is to offer researchers and practitioners an exposure on how multiple criteria decision aid contributed to the supply chain management area.

Objectives

- A volume that is easy to read with a focus on multiple criteria decision aid models for the problems related to supply chain management.
- Provide young researchers and practioners with the basis to use multiple criteria decision aid models to manage the chain of supplies.
- Short, precise and concise volume with an up-to-date information about MCDM techniques in the field of supply chain management.

Target Audience

This book seeks to offer academics and practitioners a refreshed and an enhanced view of theoretical and empirical research ideas in Multiple Criteria Decision Making in Supply Chain Management.

Publisher

This book is scheduled to be published by [Springer under the Edited Series Multiple Criteria Decision Making](#). For additional information regarding the publisher, please visit www.springer.com. This publication is anticipated to be released in the first quarter of 2020.

Recommended topics include, but are not limited to, the following:

- Multiple Criteria Decision Aid in Supply Chain Management
- Multiple Objective Programming in Supply Chain Management
- Multiple Objective Stochastic Programming in Supply Chain Management
- Fuzzy and uncertain MCDA models in Supply Chain Management
- Other MCDM techniques in Supply Chain Management

Submission Procedure

Researchers and practitioners are invited to submit on or before May 15, 2019, a 1-2-page chapter proposal clearly explaining the mission and concerns of his or her proposed chapter. Authors of accepted proposals will be notified on or before May 30, 2019 about the status of their proposals and sent chapter guidelines. Full chapters are expected to be submitted by September 30, 2019. All submitted chapters will be reviewed on a double-blind review basis. Contributors may also be requested to serve as reviewers for this project.

Important Dates

May 15, 2019: Proposal Submission Deadline

May 30, 2019: Notification of Acceptance

September 30, 2019: Full Chapter Submission

November 15, 2019: Review Results to Authors

December 31, 2019: Revised Chapter Submission

January 31, 2020: Final Acceptance Notifications

Inquiries and submissions can be forwarded electronically to:
